It provides a complete set of intuitive features to facilitate the scanning process, is very easy to use and allows you not only to adjust flash settings, but also set from the beginning if you intend to scan a single item or a stack of paper documents. The mobile solution detects limits automatically and offers many filters that you can quickly use to improve each scan. Make sure you're good enough for each item before you press the camera button and deploy the additional support grid tool. Crop and rotate images when necessary, control brightness and contrast to improve visibility, take advantage of OCR functionality, and convert images to text in dozens of languages. More than that, the software allows you to create and add e-signatures, draw and write on scans, organize files into different folders and export them as PDFs or images.
